reduce the surface run-off discharge and checking soil erosion along the embankments. To reduce temperature and increase humidity. To reduce noise pollution to the neighboring household population. The expected outcomes from the education goal are many and widespread. The College has already sponsored a poster contest for students to develop a Logo. By sponsoring tree plantings with the help of community organizations students have the opportunity to work with professionals in the tree planting.

Trees and shrubs improve soil and water conservation, store carbon, moderate local climate by providing shade, regulate temperature extremes, increase wildlife habitat and improve the land's capacity to adapt to climate change.

### **Our Vision**

Encouraging college students to participate in tree plantation programs to counter the adverse impact of climate change due to continuous indiscriminate deforestation.

### **Objective-**

- To engage students, youth and women in organized tree planting.
- To sustain the climate change campaign against deforestation using various conventional and social media platforms.
- To promote the planting of trees as a lifestyle.
- To monitor and support communal afforestation efforts.

Through the Pandit Jawaharlal Nehru College of Social Work, with the help of students, faculty, non-teaching staff and volunteers of the National Service Scheme, trees were planted in the college premises. The college intends to develop the college premises as a green zone.
